TECHNICAL SKILLS

Languages

Python, Java, C, HTML, CSS, JS

Data & AI

Machine Learning Algorithms, EDA, ADA, Advanced prompt scripting

Tools

Power BI, Tableau, Excel, MySQL, MongoDB, Docker, Git, GitHub, MS Office Suite

Concepts

Version Control, Parallel Programming

SOFT SKILLS

Problem Solving | Teamwork Management | Leadership | Effective Communication | Project Management | Adaptability | Time Management

PERSONAL SKILLS

- Adaptable & Self-motivated
- Good grasper & Fast learner
- Ability to deal with people
- Problem solving abilities

LANGUAGES

English: Proficient (C2)

Kannada: Proficient (C2)

Telugu: Native

Hindi: Proficient (B2)

HOBBIES & INTERESTS

Sports: Cricket, Football, Tennis, Carrom, Chess, Badminton, Swimming.

Arts: Music&Songs , Content Creation

Projects : I love Building projects to solve daily Real life problems !

CAREER OBJECTIVE

Motivated and adaptable software development enthusiast with foundation in Machine Learning and Data Visualization. I possess strong problem-solving abilities, effective-communication skills, Good-coding skills, solid Core-Engineering-concepts, and a creative approach to leveraging AI. I am eager to learn new technologies, expand my knowledge base, and help my organization succeed through continuous growth and teamwork.

EXPERIENCE

Software Development Intern | Getskilled (A unit of GyaanKool Research labs)

Apr 2025 – Aug 2025

- My first internship was a transformative experience, offering both technical depth and collaborative exposure.
- We worked in a hybrid setup, with weekly on-site visits and daily virtual meetings, which helped me stay closely aligned with the team's goals.
- Engineered data pipelines for multimodal inputs, leveraging ResNet for medical imaging and BERT for clinical text.
- Implemented and benchmarked fusion models to optimize diagnostic precision across modalities.
- Successfully developed a multimodal ML system for early disease detection.

PROJECTS

Multimodal AI for Early Disease Detection | GitHub Project

Jun 2025 – Present

- Designed an AI-driven healthcare system leveraging multiple data types (medical images, EHRs, genetics, symptoms).
- Applied deep learning and data fusion techniques to improve early-stage disease detection accuracy.
- Built a multimodal pipeline capable of analyzing complex patterns across diverse datasets.

Expense Tracker Web App | Personal Project

Mar 2025 – Apr 2025

- Built a responsive and interactive web application to manage income, expenses, and monthly budgets.
- Implemented transaction management with category tags, timestamps, and visual charts for spending distribution.
- Designed a mobile-friendly, intuitive interface with persistent data storage.

Ola Electric Clone | Personal Project

Feb 2025

- Created a full-stack web application inspired by Ola Electric's platform.
- Simulated features such as vehicle listings, test ride bookings, service scheduling, and charging station locators. Developed an admin panel for scooter and order

Additional Mini Project's Jan 2024 – Jan 2026

Built multiple mini-projects and experimental applications across AI/ML, web development, automation, and systems programming, including chatbot prototypes using NLP and LangChain, interactive UI components with animations, and automation workflows using n8n for data handling and visualization. Worked on GPU-accelerated projects and parallel computing using OpenMP and MPI, implemented OAuth 2.0 authentication, automated email systems via SMTP, and deployed projects on live domains. Also developed a cryptographic owner-verification mechanism that ensures project integrity by triggering self-destruction if ownership credentials are altered or removed, demonstrating strong focus on security, scalability, and real-world deployment.

EDUCATION

➤ B.E.: Computer Science & Engineering (Data Science)

Maharaja Institute of Technology Mysuru (MITM) Affiliated to Visvesvaraya Technological University (VTU) | Expected Jun 2026

GPA: 7.2

Status: 8th Semester

➤ Pre-University (PUC): Science [PCMB]

Manasarowara Pushkarini Vidhyashrama Pre-University College | Jun 2022

➤ Schooling (10th Standard): CBSE

Purna Chetana Public School, Mysore | Jul 2020

CERTIFICATIONS & ADDITIONAL QUALIFICATIONS

✓ Getting Started with Managing Remote teams (Dec 2025)

@Infosys Springboard

✓ Advanced Statistics for Machine Learning (Dec 2025)

@Infosys Springboard

✓ Technical Workshop on Data Science (Apr 2025)

@Indian Institute of Technology Hyderabad (IIT-H), in association with Elan & Envision

✓ Data Analytics Using Power BI – 30 Day Intensive (Apr 2025 – May 2025)

@TechTip24 / Skill Course E-Learning Platform, Mumbai

Comprehensive training in advanced data visualization and business intelligence techniques.

✓ Microsoft Excel Using AI Workshop (Oct 2024)

@BE 10x | QM Office Master

Advanced Excel automation using AI, mastering 200+ formulas and rapid dashboard creation.

✓ Computer Applications & Programming in C (Jul 2022 – Sep 2022)

@Indian Institute of Computer Technology (IICT)

Foundational certification covering computer concepts, MS Office Suite, and C programming.

✓ Placement Training on AIML & Data Analytics (2025)

@Tejas PRO

Hands-on training in Artificial Intelligence, Machine Learning, and Data Analytics with real-world applications.

✓ Eco-Technology ML Modeling & Data Analysis Training (2025)

@Skills4Future Focused on sustainable and green tech practices in ML and data analysis.

➤ Google Advanced Data Analytics Course (Ongoing)

@Coursera

Professional-level training in advanced data analytics, statistical methods, and applied machine learning.
